

STORGARD®

Insect Monitoring Systems

NUISANCE PESTS

SQUEEZE & SNAP® Yellow Jacket Trap

A fast-acting, high-capture-rate lure in an easy-to-use disposable or reusable trap featuring the convenient Squeeze & Snap technology.

Multi-Attractant Roach Trap

A low-profile, pre-assembled trap with a sealed, but easy-to-open, highly effective kairomone-based lure for multiple species, which is an effective tool for monitoring low-density populations.

SQUEEZE & SNAP® Outdoor Fly Trap

A fast-acting, high-capture-rate lure and trap for many fly species, with a disposable or reusable trap featuring the convenient Squeeze & Snap technology.

Indoor Fly Trap

A fast-acting, effective pheromone and kairomone based lure with no detectable odor.

Japanese Beetle Trap

The industry standard for monitoring and control of Japanese beetles, scarabs and their relatives. A high capture rate, sturdy, all weather, reusable plastic trap, with highly effective, season-long pheromone and kairomone lures, attracts both males and females.

Japanese Beetle Xpando Trap

A high capture rate, sturdy, all weather, season-long, expandable, plastic trap, with highly effective, season-long pheromone and kairomone lures, attracts both males and females. An easy-to-use trap for monitoring and control of Japanese beetles, scarabs and their relatives.
