CIDETRAK®

CMDA COMBO™ MESO™

MATING DISRUPTION PRODUCT FOR CODLING MOTH

Codling Moth,
Cydia pomonella

- 32 dispensers/acre compared to 200 conventional combination pheromone-only products.
- 2 for 1: Disrupts both female and male CM
- CM: Disrupts CM oviposition, reduces mating, maintains higher virginity and lowers damage.
- Long-lasting full season performance.
- Fast application ready-to-use packaging and ready-to-apply dispensers.
- No moving parts, no batteries, no gummy deposits.
- Removal not required.

Fast and Easy Application

Unique Application/Hanging System and Ready-to-Use carrier Pack!

Also consider using these great products!

Features:	Benefits:
· Single MESO dispenser (32 dispensers/acre)	· Dual effect: CM Pheromone, Male; DA Kairomone, Male and Female
· Dramatic reduction of dispenser rate/increased performance	· Less labor, "Less insecticide", Less damage
· Reduces/delays primary mating and severely limits secondary mating	· Significantly reduces damage and long term development, Less insecticide required
· Significantly maintains virginity	· Significantly reduces damage, Less insecticide required
· Patented, high performance rotating hook - hanging device	· Fast application, no branch scarring = Less labor/Tree safety
· Apply with pole applicator or mechanical system	· Fast, low cost application
· Personalized carrier packaging	· Convenient application/better inventory control = Less material/Less labor
